

DISPLAY SOLUTIONS, Inc.

UNIQUE SOLUTIONS FOR UNIQUE PROBLEMS

Display Solutions, Inc. in Hudson, MA announces that it has completed the system upgrade for the Lockheed Martin Company Systems Integration Demonstration Center (SIDC) in Arlington, VA. The upgrade replaces their existing direct view flat panels with a high-fidelity projector visual system and curved screen.

Display Solutions delivered and installed a 3-Channel visual display projection system with 150 degrees HFOV and 45 degrees VFOV. The SIDC upgrade was accomplished with little or no modification to the existing office space. Display Solutions provided a system comprised of Projection Design F2 video projectors, a Hurley cylindrical screen and video pre-processors manufactured by 3D Perception. Video pre-processors are used to optimize geometry correction, image edge matching, color matching and "hot-spot" reduction. The visual projection system is driven by Diamond Visionics' GenesisRT™ image generators. GenesisRT™ renders a real-time visual scene directly from source data.

About Display Solutions, Inc.
